

CALL FOR PAPERS

Since 1998 the mission of Communications in Dependability and Quality Management, An International Journal has been contribute to the development reliability, quality, maintainability, safety, effectiveness and related engineering sciences. The list suggests some of the topics which will be of interest, but not limited to the following:

- Dependability Management Life Span,
- Configuration Management and Quality Management,
- Safety and Environmental Protection,
- Project Management and Production Management.

This Call for Papers seeks both theory based and Industrial application based contributions addressing to the functional areas with international dimension. Authors are reminded that editorial processing of their manuscripts will be greatly facilitated if they give enough attention to the "Instructions to Authors" printed on the end of the journal.

Submitted papers should not have been previously published. A brief biography of the authors should also accompany the manuscript. Electronic submissions of papers in final form, in Word file, is required. All manuscripts should to be submitted to the Editor-in-Chief e-mail address.
